Research Volunteers Needed!

Researchers in the Center for OCD, Anxiety and Related Disorders are conducting a study to understand the causes of obsessive compulsive, chronic tic, and related disorders.

WE ARE LOOKING FOR VOLUNTEERS OVER THE AGE OF 4 WHO:

- Do not have OCD, chronic tic, and related disorders (for example, Tourette syndrome, hoarding disorder, body dysmorphic disorder, skin picking or hair pulling disorder.)
- NO history of dementia, encephalitis, meningitis or severe head injury.

This study involves a questionnaire, an interview about your health and behavior history and a spit/blood draw. (About 1-5 hours)

Participants will be compensated for time spent in the study.

If interested please email or call the PGENeS Research Team at PGENeS@hsc.ufl.edu or 352-294-5564.
